CICD: an easy way for more profit

Why you should invest in CICD

Benefits of CICD:

1- Increase Revenue

2- Reduce Cost

3- Avoid Cost

How does CICD Increase Revenue?

CICD helps with faster and more frequent production deployments which leads to new features being available sooner

CICD can run automated smoke tests which leads to less downtime from a deploy-related crash or major bug

CICD can perform automated rollback when Job Fails which return production to up state quickly

How does CICD Reduce Cost?

CICD helps with automate infrastructure cleanup which leads to less infrastructure costs from unused resources

CICD can catch compile errors after merge which leads to less developer time on issues from new developer code

How does CICD Avoid Cost?

CICD helps with catch unit test failures which leads to less bugs in production and less time in testing

CICD can help detect security vulnerabilities which Prevent costly security holes

CICD can automate infrastructure creation which leads to less human error and faster deployments

Thanks
